PROFESSIONAL SUMMARY

IT professional with over two years of experience as a Database Administrator in a software company and hands-on experience building and running live websites and online stores. Administers **Microsoft SQL Server** databases, supports business applications and end users, and builds web solutions with **Next.js, React and TypeScript**. A proactive team player who takes ownership of results – built and runs the **Sundex Vitamin** e-commerce platform independently and automates routine admin work with PowerShell, Python and AI tools (Claude, Codex). Motivated to contribute to and grow with an international IT team in Switzerland.

PROFESSIONAL EXPERIENCE

Database Administrator — FAF Global

Warsaw, Poland · Sep 2023 – Oct 2025

- Administered and supported **Microsoft SQL Server** databases behind the company's business applications using SSMS.
- Wrote and ran **SQL queries** to retrieve, validate and correct business data and answer internal data requests.
- Monitored database health, scheduled jobs and backups; performed routine maintenance, data clean-up and Excel/CSV imports/exports.
- Managed user accounts, roles and access permissions for databases and business applications.
- Investigated application errors and data inconsistencies, reproduced bugs and documented findings for developers.
- Provided first- and second-level support to end users on application access, data issues and Windows workstations.
- Prepared data extracts and Excel reports for management and kept technical procedures documented.

AI-Assisted Web Developer & Website Manager — Independent / Freelance

Remote · 2024 – Present

- Design, build and launch responsive websites and online stores for clients, from requirements gathering to go-live.
- Use AI-assisted workflows (**Claude, Claude Code, OpenAI Codex**) to generate, refactor and debug code, and **Superdesign** for UI design and rapid prototyping.
- Built and run **Sundex Vitamin**, a Turkish supplement e-commerce store selling **thousands of products per month**: custom **Next.js** storefront and self-written **admin panel**.
- Handle domains, hosting, SSL, deployment, backups and ongoing maintenance; manage clients from requirements to handover.

PROJECTS

Sundex Vitamin – Live E-commerce Store www.sundexvitamin.com
Next.js storefront + custom **admin panel**, built and run solo: catalogue, cart, card/bank checkout, campaigns, blog.

IT Support PowerShell Toolkit github.com/yigitdikmenq/it-support-powershell-toolkit
PowerShell module: Active Directory onboarding from CSV and offboarding, stale-account and **Microsoft 365** licence reports, inventory and network checks; **41 Pester tests**, CI on PS 5.1 and 7.

Alpenmarkt – Swiss E-commerce Store yigitdikmenq.github.io/alpenmarkt-store
React, TypeScript, Vite: cart, Swiss checkout (CHF, VAT), EN/DE; **31 unit tests** (Vitest), CI/CD via GitHub Actions.

SQL Reporting Toolkit github.com/yigitdikmenq/sql-reporting-toolkit
T-SQL / SQL Server 2022: management reports, data-validation checks, user & role management, backup and index-maintenance scripts.

IT Automation Scripts github.com/yigitdikmenq/it-automation-scripts
Python tools for Windows IT support: system health check, event-log scanner, new-user onboarding checklist.

Helvetia IT Solutions yigitdikmenq.github.io/helvetia-it
Bilingual **EN/DE** business website for an IT services company (HTML, CSS, JavaScript).
