Location: Warsaw, Poland → Switzerland
Personal: Born 2001 · Turkish · Married

> **Work authorisation:** Married to an EU (Polish) citizen; relocating together to Switzerland and eligible for a Swiss permit under the EU–Swiss Agreement on the Free Movement of Persons. No sponsorship required.

PROFESSIONAL SUMMARY

Web developer who designs, builds and maintains responsive websites and online stores using AI-assisted development workflows (Claude, OpenAI Codex, Superdesign). Backed by over two years of experience as a Database Administrator in a software company, bringing a solid understanding of SQL, data and troubleshooting to web projects. Experienced in working directly with clients from requirements to delivery. Motivated to join a Swiss web or digital team and keep growing as a developer.

PROFESSIONAL EXPERIENCE

AI-Assisted Web Developer & Website Manager — Independent / Freelance
Remote · 2024 – Present

- Design, build and launch responsive websites and online stores for clients, from requirements gathering to go-live.
- Use AI-assisted workflows (**Claude, Claude Code, OpenAI Codex**) to generate, refactor and debug code, and **Superdesign** for UI design and rapid prototyping.
- Develop and maintain **e-commerce** sites (product catalogues, cart and checkout flows) and websites for online entertainment businesses.
- Handle domains, hosting, SSL, deployment and backups; provide ongoing updates, maintenance and fixes.
- Optimise sites for mobile, page speed and basic SEO.
- Manage the full client relationship: requirements, quotes, sales, delivery and handover/training.

Database Administrator — FAF Global
Warsaw, Poland · Sep 2023 – Oct 2025

- Administered and supported **Microsoft SQL Server** databases behind business applications; wrote SQL queries to retrieve, validate and correct data.
- Investigated application errors and data inconsistencies, reproduced bugs and documented findings for the development team.
- Monitored scheduled jobs and backups, managed user access and performed routine maintenance and data imports/exports.
- Supported end users and internal teams with application issues, data requests and Excel reports.
